PARTICIPATE IN A RESEARCH STUDY ON PATIENT COOLING

Researchers in the Department of Emergency Medicine, Applied Physiology Lab are recruiting subjects for a study on patient cooling. There are two visits for this study (the first visit includes a physical exam). You will be cooled with water though an IV in your arm. The protocol visits will take approximately four hours to complete. You will receive either a placebo or a medication that will cause sleepiness. We will monitor your temperature, heart rate and blood pressure. This study will be conducted in the Department of Emergency Medicine lab at 3600 Forbes Ave. Earn up to $100 for your participation.

Who is eligible?

- Healthy individuals age 18 or older
- Persons without any heart, respiratory, gastrointestinal problems
- Persons not taking any medications (except over the counter or allergy medications)
- Non-pregnant if female

This study is being conducted by Dr. Frank Guyette, MD, MPH and Dr. Clifton Callaway, MD, PhD. For more information, please contact the Department of Emergency Medicine at 412-647-3078.
